SUMMARY

Full Stack Web Developer with expertise in front-end and back-end technologies, including the MERN stack. Demonstrated ability to build user-centric applications, solve complex problems, and work effectively in team environments. Committed to continuous learning and staying updated with industry trends. Recognized for attention to detail and delivering high-quality results on time.

TECHNICAL SKILLS

Technical Languages:

HTML, CSS, JavaScript, Node.js, SQL, NoSQL

Applications & Tools:

Git, GitHub, Heroku, Bootstrap, jQuery, AJAX, JSON, Sequelize, Handlebars.js, EJS, React, Express.js, MongoDB, MySQL, Progressive Web Apps (PWAs)

PROJECTS

iHike

GitHub: https://github.com/prismhead26/I-Hike

Deployed: https://i-hike.onrender.com/

iHike is a MERN stack application designed to reconnect people with nature by simplifying the discovery of nearby hiking trails. Users can input their city to access a curated list of hikes with detailed descriptions and difficulty levels, promoting physical and mental health benefits while fostering a community of hikers.

Implemented responsive design principles to ensure compatibility across devices.

Tools / languages used: GraphQL,MongoDB, Express.js, React, Node.js, Git, GitHub, Google Maps API, Open Weather Maps API, Bootstrap, etc.

TrackNHeal

GitHub: https://github.com/prismhead26/Patient-Portal-App-Team-Colab

Deployed: https://tracknheal-be5b35216eb1.herokuapp.com/

In response to rising illnesses and the COVID-19 crisis, we developed a patient portal application to enhance communication between patients and medical professionals. This application allows healthcare providers to manage patient health by tracking logs, scheduling appointments via the npm calendar package, adding new patients, and personalizing notes.

Integrated third-party APIs for enhanced functionality and improved user experience.

Tools / languages used: Node.js, Express.js, MongoDB, Bootstrap, Heroku, MVC, MySQL, Sequelize, fullCalendar.js API, Day.js, etc.

Meal Planner

GitHub: https://github.com/prismhead26/Meal-Planner-Project

Deployed: https://prismhead26.github.io/Meal-Planner-Project/

Our meal planner project, built with JavaScript, CSS, and HTML, allows users to explore and select dishes from various cuisines. Additionally, users can choose a random cocktail and view multiple drink options, making meal and drink planning enjoyable and convenient.

Tools / languages used: Node.js, Spoonacular API, and TheCocktaildb API.
